Persona: Jordan

Segment

Format-Constrained Score Navigators

Quote

"If you don't download it and you try to open it at the football games, you're not getting it. It's not happening." — Interview 1

Goals

Keep the assigned digital score available during a football game; move through a multi-page score without interrupting play; get back to the correct score quickly when switching pieces.

Pains

A score may not open at a football game unless it was downloaded in advance. Moving between items in Google Drive takes time. While playing, Jordan must wait for a moment when one hand is free before scrolling.

Behaviors

Downloads all score files into one offline section before use. Uses PDFs from a shared Google Drive and, when a passage permits, scrolls with one hand while continuing to play.

Scenarios

Scenario 1

Trigger: Jordan needs to open the assigned PDF at a football game.

Context: In a marching ensemble, Jordan uses a phone because a laptop cannot be placed on the drum; the score was distributed through a shared Google Drive.

Goal: Open the correct part reliably and be ready to play.

Current Pain: If the score was not downloaded ahead of time, it will not open at the football game; finding and switching among Drive items also takes time.

Scenario 2

Trigger: Jordan reaches the next portion of a multi-page score while playing.

Context: During marching rehearsal or performance, the score is displayed on a phone and Jordan is still playing.

Goal: Move to the next visible portion of the score while maintaining the performance.

Current Pain: Jordan has to wait for a passage that can be played with one hand, scroll with the other hand, and then return to playing.

User Stories

As Jordan, I want my assigned score files available offline in one place, so that I can open the correct part at a football game without relying on connectivity.

As Jordan, I want to switch quickly between the score PDFs I need, so that I can be ready when the ensemble changes pieces.

As Jordan, I want to advance through a multi-page score with minimal hand interaction, so that I can keep playing without losing my place.

Evidence Traceability

Segment → Persona: Jordan represents the Format-Constrained Score Navigators segment through the need for reliable file access and in-the-moment score movement.

Persona → Scenarios: Scenario 1 follows the documented offline-download workflow; Scenario 2 follows the documented one-handed scrolling workflow.

Scenarios → User Stories: The first two stories address Scenario 1; the third story addresses Scenario 2.

Interview evidence: Complete Combined Interview Scripts, Interview 1 (digital PDF delivery, offline downloads, switching files, and one-handed scrolling while playing).
